DETAILED ACTION

This action is in response to the Amendment filed on 26 December 2007 in which claims 1-11 are pending.

Response to Amendment

The declaration under 37 CFR 1.132 filed 26 October 2007 is sufficient to overcome the rejection of claims 1-11 based upon Minami et al (U.S. Patent No. 6886221).

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Ashery on 7 January 2008.

The application has been amended as follows:

In The Claims

In claim 1, line 1, after the word *device*, insert --for use in a telephone handset --

In claim 7, line 1, after the first instance of the word *equipment*, insert --including a telephone handset--.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The Applicant filed a declaration under 37 CFR 1.132 showing that the instant application has a common assignee with the Minami et al (Pat. No. 6,886,221), and was derived from the inventor of this application and is thus not the invention "by another."

Therefore, the opening and closing device comprising: a stator having a stator cam; and a rotor having a rotor cam urged to the stator cam by a spring, and rotatable with respect to the stator; wherein the stator cam includes: a flat stator portion and a projecting stator portion, the projecting stator portion including a first tilting portion and a second tilting portion extending from the flat stator portion to the first tilting portion, and a first inclined plane formed on a side wall of at least one of the first tilting portion and the flat stator portion; and wherein, the rotor cam includes: a projecting rotor portion; and a second inclined plane formed on a side wall of the projecting rotor portion; and wherein, friction between the stator cam and the rotor cam is greater (a) when the first inclined plane and the second inclined plane are in contact with each other than (b) when the first inclined plane and the second inclined plane are not in contact with each other, as substantially described and connected with the functional language of the recited claims is deemed allowable.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phylesha L. Dabney whose telephone number is 571-272-7494. The examiner can normally be reached on Mondays, Wednesdays, Fridays 8:30-4 PM.
